HACKS

Sponsorship Prospectus

What is Epsilon Hacks?

Epsilon Hacks is a 24/27-hour hackathon that is targeted to develop real-world, digital solutions to problems that exist in our community. This hackathon aims to provide a comfortable and safe atmosphere for students in the Bay Area to communicate with other people as well as gain a greater understanding at current problems. Therefore, all money given to Epsilon Hacks will be used to fund the food, venue, and other items that aim to make this hackathon a memorable experience for all who attend.

What are the logistics of Epsilon Hacks?

Unlike other hackathons, Epsilon Hacks will be focused on building real-world solutions to problems in our current community, as opposed to solving a computer science problem. In order to do this, we will be working with the City of Fremont and surrounding cities to develop a deeper understanding of prevalent problems in our communities that we should focus on. By developing digital solutions to social problems, we will be helping our community become a better place in the long term.

Why sponsor Epsilon Hacks?

Epsilon Hacks is one that seeks students of all experiences to meet other people who have the same goals in mind. Your funds will help students understand and explore the vast world of computer science, allowing them to become interested in the field and become agents of change in the future. Your company will be sponsoring tomorrow's software engineers, thinkers, and scientists. In addition, the resources that you provide us with will help more people learn about your company and how it is influencing the world today.

How can you help?

- ⌘ Sponsor a meal for students
- ⌘ Host a software workshop or activity to get students interested in the community
- ⌘ Send company representatives to our booths where they can spread the company's swag as well as talk to students about their company
- ⌘ Contribute money that will be used for supplies
