

About Us:

EpsilonHacks is a hackathon ran by students from the Fremont Unified School District who aim to give students the chance to experience the Bay Area in its fullest. Our mission is to be able to give students the opportunity to work alongside students they normally would not be able to, at least in a school environment. We want to challenge their minds to the best of their ability and give them that small push they need in order to create something extraordinary, something they didn't even know they can do.

As we are a student-run hackathon, we had a few ups and downs. However, we did not choose to give up, but instead, work harder to achieve our goal. In the end, we were able to create a team full of motivated and passionate students willing to dedicate so much of their time in order to ensure EpsilonHack's success.

Frequently Asked Questions (FAQ):

- What is a hackathon?
 - A hackathon is an exciting and interactive event where people of different fields (such as programming, designing, etc.) join together in order to collaboratively tackle a unique problem/idea and create something from scratch. (And it has nothing to do with hacking!)
- Where and when is EpsilonHacks?
 - It will take place on March 14-15, 2019. It will be at ...
- How do I sign up?
 - ...
- How do teams work?
 - Once you arrive at the venue, we will have a variety of events for you to socialize with new people and form teams together.
- Why should I come?
 - We can't force anyone to come or not. However, we can promise you that coming to EpsilonHacks will definitely open your horizons, in one way or another. You will meet people of new and diverse backgrounds, try out new things, and more!
- Who can participate?
 - Any high school student enrolled in the Bay Area can join us for a fun time :)
- Is there a fee?
 - ...
- What do I need to bring?
 - Make sure to bring your liability form, a laptop (don't forget your charger), and your brain!
- What do I need to know in order to participate?

- Even if you don't have any prior experience, it's all good! We will be holding workshops in between events to help out those who are new to programming but have that burning passion inside of them to learn.
- What if I have dietary restrictions?
 - That's perfectly okay! We took into consideration of people who might have dietary restrictions and made sure to cater food that allows everyone to have a full stomach at the end of the day.
- Other Questions?
 - If you have any other questions, feel free to email us as epsilonhackathon@gmail.com!
